Abdelrahman Soliman

abdelrahman/github — abdelrahmansoliman047@gmail.com — abdelrahman/linkedin
+201208117448 — Address : Cairo, Egypt

Summary

Results-driven Dedicated AI Engineer with a strong foundation in machine learning, deep learning, and computer vision. Proven experience in building and deploying end-to-end AI solutions using TensorFlow, PyTorch, and OpenCV. Passionate about leveraging technical expertise to solve real daily problems.

Education

Shorouk Academy - Computer Science ,Bachelor **2021–2025**

GPA: 3.4 — **Key Courses:** AI, Machine Learning, Deep Learning, NN, Computer Vision, NLP , Operating System, Software Engineering , Data Base , Decision Support System .

Work Experience

Start-up - AI Engineer **July 2025 - Present**

- Drive the design and deployment of end-to-end AI solutions within an agile, cross-functional team, delivering tailored models for client NLP, computer vision, and predictive analytics needs.
- Building and integrating machine learning models into real-world applications (NLP, computer vision, and predictive analytics)
- Supporting business growth by creating scalable AI-driven services tailored to client needs

Simplex - Intern **July 2024 - August 2024**

- Contributed to R&D efforts by prototyping and testing solutions, leading to a **20-30%** improvement.
- Supported the Marketing team with initiatives by developing technical content that increased customer engagement with market research, product & branding.

Competitive Programming Coach **October 2023 - July 2025**

- Trained and mentored **+100** students,in problem-solving algorithms and data structures for programming competitions with **80 %** showing significant improvement in competition rankings.
- Developed customized training materials and practice problems to improve students' technical skills
- Conducted regular coding sessions and provided feedback on optimization techniques

Projects

Face Attendance and Departure System **April 2025**

- Built face recognition workflows using Python and OpenCV to detect and identify individuals
- Automated attendance logging and departure time recording with database integration
- Enhanced accuracy and reduced manual overhead in monitoring presence

Pronunciation Analysis **May 2025**

- Speech analysis tool leveraging AI to evaluate and improve pronunciation accuracy
- Implemented audio preprocessing and feature extraction for phoneme-level analysis
- Applied similarity scoring methods like Levenshtein distance to assess pronunciation accuracy

Nursery Customer Service Chatbot **June 2025**

- AI-powered customer service assistant built with Integrated Gemini API with a fine-tuned FLAN-T5 model to enhance language understanding, intent recognition, and dialogue accuracy
- Developed conversational agent to handle customer queries, FAQs, and support requests

Demo Hand Writing analysis **June 2025**

- Developed an interactive handwriting analysis platform using computer vision (OpenCV, NumPy) and AI tools, implementing real-time stroke analysis with intelligent feedback, scoring, and progress tracking.

Courses & Certificates

Coursera – Deep Learning **July 2025 - Sep 2025**
Key Focus: Neural networks, deep learning architectures, convolutional networks, recurrent networks, and practical applications in AI systems.

Coursera – Machine Learning **April 2025 - June 2025**
Key Focus: Supervised and unsupervised learning, regression models, classification algorithms, and model evaluation techniques.

Coursera – Mathematics for Machine Learning and Data Science **July 2025 - Sep 2025**
Key Focus: Linear algebra, calculus, probability, statistics, and mathematical foundations for machine learning algorithms.

DEPI – Generative AI and Soft Skills **May 2024 - Nov 2024**
Key Focus: Generative AI models, machine/deep learning, MLOps, MLflow, Hugging Face, GANs, NLP projects, prompt engineering, computer vision.

Udemy – Data Structures and Algorithms using C++ and Python **Sep 2022 - Feb 2023**
Instructor: Dr. Mostafa Saad
Key Focus: Algorithm analysis, data structures implementation, time/space complexity, and problem-solving techniques in C++ and Python.

Skills

Programming Languages	Python, C++, SQL
Data Structures & Algorithms	Problem Solving, Time/Space Complexity, OOP, Design Patterns
Machine & Deep Learning	Supervised and Unsupervised and Reinforcement learning , Ensemble Method, NN, CNN, RNN, LSTM, Transformers, Transfer Learning , Model Evaluation & Optimzation.
Computer Vision	Object Detection, Image Segmentation, Facial Recognition, OpenCV, YOLO
AI Frameworks & Tools	TensorFlow, PyTorch, Hugging Face
Data Techniques	Data Collection, Data Wrangling, Data Mining, Data Preprocessing, Feature Engineering & Selection
DevOps Tools	Git, GitHub, FastAPI, Flask
Soft Skills	Problem-Solving, Creative Thinking , Team Leadership, Teamwork, Adaptability, Presentation, Critical Thinking

Languages

Arabic (Native) — English (Professional Proficiency) — German (level A2)
